Robeco Sustainable Property Equities B EUR (LU0454739706)

This fund is a subfund of Robeco Capital Growth Funds, SICAV

Management Company: Robeco Institutional Asset Management B.V.

Objectives and investment policy

Robeco Sustainable Property Equities is an actively managed fund that invests in stocks in developed countries across the world. The selection of these stocks is based on fundamental analysis. This fund identifies strong global property trends first. Within these trends the fund aims to select the property companies with the best prospects. Carefully developed models are used to select stocks with good earnings prospects and a reasonable valuation. Discussions with management and business-data analyses are then carried out in order to stringently screen the individual companies. Voting, Engagement, ESG Integration and Robeco's exclusion policy are part of the investment policy.

The fund aims for a better sustainability profile compared to the Benchmark by promoting certain ESG (i.e. Environmental, Social and corporate Governance) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation and integrating ESG and sustainability risks in the investment process. In addition, the fund applies an exclusion list on the basis of controversial behavior, products (including controversial weapons, tobacco, palm oil

and fossil fuel) and countries, while avoiding investment in thermal coal, weapons, military contracting and companies that severely violate labor conditions, next to proxy voting and engagement. The fund also aims for an improved environmental footprint compared to the Benchmark.

The fund can engage in currency hedging transactions.

Benchmark: Property Equities S&P Developed Property Index

The investment policy is not constrained by a benchmark but the fund may use a benchmark for comparison purposes. The majority of stocks selected will be components of the Benchmark, but stocks outside the Benchmark may be selected too. The fund can deviate substantially from the issuer, country and sector weightings of the Benchmark. There are no restrictions on the deviation from the Benchmark. The Benchmark is a broad market weighted index that is not consistent with the ESG characteristics promoted by the fund.

This share class of the fund will distribute dividend.

You can purchase or sell units in the fund on any valuation day. This fund may not be appropriate for investors who plan to withdraw their money within 7 years.

Risk and reward profile

Historical data, such as is used in calculating the synthetic indicator, is not a reliable indication of the future risk profile. The risk and reward category shown is not guaranteed to remain unchanged, the categorization may shift over time. The lowest category does not mean a risk-free investment.

Equities in general are more volatile than bonds. Equity theme funds have a view on a specific segment of the equity market. By making the choice to focus on a specific segment the fund becomes more volatile as price movements of shares within this theme tend to have a larger impact on the value of the fund.
