Robeco Asia-Pacific Equities D EUR (LU0084617165)

This fund is a subfund of Robeco Capital Growth Funds, SICAV

Management Company: Robeco Institutional Asset Management B.V.

Objectives and investment policy

Robeco Asia-Pacific Equities is an actively managed fund that invests in stocks in developed and emerging Asian-Pacific countries. The selection of these stocks is based on fundamental analysis. The fund's objective is to achieve a better return than the index. The fund focuses on stocks of companies incorporated in Asia, Australia or New Zealand or those companies that exercise major part of economic activity from these regions. Country allocation is a less important performance driver, implemented via country and currency overlays.

The fund promotes ESG (i.e. Environmental, Social and corporate Governance) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation and integrates ESG and sustainability risks in the investment process. In addition, the fund applies an exclusion list on the basis of controversial behavior, products (including controversial weapons, tobacco, palm oil and fossil fuel) and countries, next to voting and engaging.

The fund is allowed to pursue an active currency policy to generate extra returns.

Benchmark: MSCI AC Asia Pacific Index (Net Return, EUR)

The majority of stocks selected will be components of the Benchmark, but stocks outside the Benchmark may be selected too. The fund can deviate substantially from the weightings of the Benchmark. The fund aims to outperform the Benchmark over the long run, whilst still controlling relative risk through the applications of limits (on countries and sectors) to the extent of deviation from the Benchmark. This will consequently limit the deviation of the performance relative to the Benchmark. The Benchmark is a broad market weighted index that is not consistent with the ESG characteristics promoted by the fund.

This share class of the fund does not distribute dividend. You can purchase or sell units in the fund on any valuation day. This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

Historical data, such as is used in calculating the synthetic indicator, is not a reliable indication of the future risk profile. The risk and reward category shown is not guaranteed to remain unchanged, the categorization may shift over time. The lowest category does not mean a risk-free investment.

Equities in general are more volatile than bonds. Regionally focussed funds have a view on a specific segment of the equity market. By making the choice to focus on a specific segment the fund becomes more volatile as price movements of shares within this region tend to have a larger impact on the value of the fund.

The following data are deemed material for this fund, and are not (adequately) reflected by the indicator:

- The product has an emerging markets focus. Shares listed in emerging markets are by their nature sufficiently liquid, yet may under certain circumstances have a low level of liquidity impacting the liquidity of the product.
- The product invests or may invest in China A-shares. Investing in China A-shares carries increased risk, most notably liquidity, regulatory, quota, custody and broker risks.
